

MOVEMENT PATTERN 1: SINGLE LEG FORWARD LUNGE

Directions:

Stand tall with your feet hip-width apart, hands on your hips. Brace your core, step forward and slowly lower the back knee toward to ground as far as you can. Keep your weight on your front leg. Press through your front foot to return to the starting position.

Common Faults:

- Limited ROM: Knee does not come within a few inches of ground.
- Controlled posture: Spine/head/shoulder do not remain upright and facing forward.
- Front knee does not remain facing forward (not falling inward or outward)
- Front foot does not remain flat.
- Body does not remain under control throughout movement
- There should not be excessive effort/overexertion.

Scoring Criteria:

3: Lunge performed with back knee within a few inches of the ground **without faults**
 2: Lunge performed with back knee within a few inches from the ground **with 1-2 faults**
 1: Lunge performed at least halfway down and/or performed **with 3 or more faults.**
 0: Lunge performed less than halfway down, movement **cannot be** performed and/or causes pain.

MOVEMENT PATTERN 2: SINGLE LEG DIP

Directions:

Start with feet together and hands on the hips. Lift *reach* leg off the ground and balance on the *stance* leg. Slowly bend the *stance* leg as you extend your reach leg forward approximately 12 inches. Briefly touch the heel of the *reach* leg to the ground, then return to the starting position.

Common Faults:

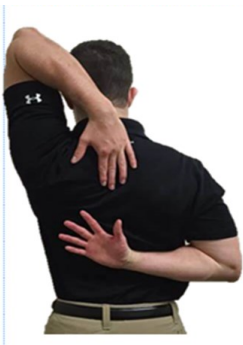

- Worker does not maintain good control or has loss of balance.
- Worker rotates body
- Foot of *stance* leg falls excessively inward or outward
- Knee of *stance* leg falls inward or outward.
- Hips do not remain level
- Excessive effort/overexertion.

Scoring Criteria:

3: Movement is performed without any faults
 2: Movement performed with 1-2 faults
 1: Movement performed with 3 or more faults
 0: Movement can not be performed or causes pain/discomfort

Score stance leg for right or left side

MOVEMENT PATTERN 3: Shoulder Reach Behind Back

Directions:

Start with both arms down by your side. In one motion, place the top hand over the head and down your back as far as possible while simultaneously taking your other hand up your back as far as possible. Repeat both sides.

Common Faults:

- Asymmetry of movement (i.e. lateral flexion)
- Rounded Shoulders
- Behind the Back – finger tips of bottom arm do not reach opposite inferior angle of scapula
- Finger tips of top hand do not reach mid-line of spine.
- Overlapping hands (caution hyper-mobility)
- Finger walking-excessive effort

Scoring Criteria:

3: Movement is performed with upright posture without any faults, and hands are within one hand length apart.
 2: Movement performed with 1-2 faults, and hands are not within one hand length apart.
 1: Movement performed but with 3 or more faults, and hands are not within one hand length apart.
 0: Movement can not be performed or causes pain/discomfort.

MOVEMENT PATTERN 4: TRUNK ROTATION

Directions:

Stand with your feet shoulder width apart and cross arms in front of body. While keeping your feet planted and lower body stationary, rotate torso as far as possible to one side. Repeat to other side

Common Faults

- There should not be excessive lower extremity movement
- There should not be spine/pelvis deviation from center
- There should not be excessive motion of the cervical spine
- There should not be any excessive effort or overexertion

Scoring Criteria:

3: Movement is performed without any faults and rotation is to at least 45 degrees
2: Movement performed with 1-2 faults and rotation is at least 45 degrees
1: Movement performed with 3 or more faults and rotation is at least 45 degrees
0: Movement can not be performed or causes pain/discomfort and rotation is not to 45 degrees

MOVEMENT PATTERN 5: CERVICAL ROTATION

Directions:

Stand or sit with upright posture. With head facing forward, slowly rotate head to one side leading chin towards shoulder.

Common Faults

- Limited ROM: chin does not pass midline of clavicle.
- There should not be shoulder movement during head rotation.
- There should not be rounded shoulders or forward head lean.
- Neck should not deviate from midline
- There should not be any excessive effort or overexertion

Scoring Criteria:

3: Movement is performed without any faults, and chin passed mid-line of clavicle.
2: Movement performed but with 1-2 faults, and chin passes mid-line of clavicle.
1: Movement performed with 3 or more faults or chin does not pass mid-line of clavicle.
0: Movement can not be performed or causes pain/discomfort

Scoring:

Highest possible= 15

Score between: 0– 5 = High opportunity for improvement

6 -10 = Medium opportunity for improvement

11– 15 = Low opportunity for improvement
